

Africa

African elephant finger puppet

Why not make this simple finger puppet?

How to make it

- 1 Colour the elephant template below and stick it onto a piece of card.
- 2 Ask a grown-up to help you cut around the template and cut out the nose hole (as shown).
- 3 Your African elephant finger puppet is now finished. If you put your finger through the hole it will become his trunk!

Why not design and make your own African animal finger puppet?

Be careful or ask an adult for help when using scissors.
