## Rockpool scavenger hunt

Although rockpools are a great place to find aquatic life, they can also be dangerous areas to play. Make sure you are with an adult when playing near water and that they know where you are at all times. Tread carefully – try not to disturb any of the creatures you find.

Rockpools provide a thriving habitat for lots of different creatures. Print out this scavenger hunt to play the next time you visit the seaside - and get exploring!

### How to play

The aim of the game is to find as many items on this list as you can. Tick the items as you find them!

#### Shell
